Here's my code: def admin_save_company(request, company_name): if request.method == 'POST': x = request.POST.get('name') print x return render(request, 'company_management/save_company.html', {'company_name': company_name}) Also in the save_company.html file, I'm trying to have an input field that will accept the 'name' that I just printed out. Here's the save_company.html file: {% extends "company_management/base.html" %} {% load i18n %} {% block content %} Company Name
