XE5 The Embarcadero
RAD Studio XE5 is the
next generation of RAD

Studio. 6.x for Delphi
and. 2.6.Q: Fluent
NHibernate: Lease class
for any date range I'm
using the Lease class
from Greg Young (see
here), which effectively
takes the following
approach: A "lease" is a
section of time where
an entity (in this case
User) is allowed to be
referenced. So a lease is
defined as an enum
where each enum value
represents a different

```
    date: public enum
LeaseType { FromNow
= 0, FromStart = 1, By
= 2, Until = 3 } It then
has a property for the
start and end date:
    public virtual
LeaseType Start { get;
set; } public virtual
LeaseType End { get;
set; } A Lease is then
defined as: public class
Lease { public virtual
User User { get; set; }
    public virtual IList
Users { get; set; } public
```

```
Lease() { Users = new
List(); } public virtual
DateTime Start { get;
set; } public virtual
DateTime End { get;
set; } public virtual bool
StartExpired { get { if
(Start ==
LeaseType.FromNow)
return true; return (Start
> End); } 3e33713323
```
