More information: developer website After a long wait, the XXI generation of the Call Of Duty franchise has finally arrived: Black Ops 4. Last year's Call Of Duty: WW2 only managed to get a bit more than four million players to play through the game in the first five days of its release, which is understandable, considering how many years it took the franchise's developers to develop the game. Now, after six years, Treyarch has brought the game to the PC with all of its previous hardware requirements and add-ons in tow: 6GB of RAM, at least 8GB of RAM, and a graphics card with at least 512MB of RAM. Also, with Black Ops 4, the developers are trying to make the game compatible with VR. Black Ops 4 announcement trailer From the first trailers, we have already known what Black Ops 4 is all about and what you need to expect from it: plenty of tools and in-depth arsenal customization, a story, a new setting, and some modes that try to do something different from the previous games in the franchise. The campaign mode in Black Ops 4 is 14 missions long, and these are divided into three segments: the campaign, Blackout, and Blackout Rising. In the campaign mode, you take on one of five characters: Michael, Nikolai, Francis, Carlos, and Jamal. The campaign shows you the effects that a zombie apocalypse brings to the characters that live in Miami. For instance, some characters will try to flee from the danger, but others will die or have their lives changed forever. The second mode is called Blackout, which is basically a new take on the MOBA element that the first Black Ops game featured. In this mode, you and three friends can take on a new Zombies mode, called Blackout Zombies, which basically shares many different pieces of Black Ops 4's mode with the normal Zombies mode. The third mode is Blackout Rising, which starts out as Blackout mode, and has the goal of delivering new Black Ops 4's maps and introducing new Blackout modes. You can expect the usual modes for the Blackout Rising, such as b7e8fdf5c8

How to show that the function  $f(x)=\sum_{n=0}^{\infty} \frac{x^n}{n!}$  is continuous? A: HINT: Use  $\sum_{n=0}^{\infty} \frac{x^n}{n!} - \sum_{n=0}^{\infty} \frac{x^{n+1}}{(n+1)!} = \sum_{n=0}^{\infty} \frac{x^{n+1}}{(n+1)!}$  Now that the 2014 season has officially wrapped up, we can take stock of just how amazing the Panthers were this season. Panthers went 15-1 and only have 12 losses by more than seven points, but we didn't even know those numbers until relatively recently. No one outside of Carolina, including owner Jerry Richardson, ex-coach Dom Capers and general manager Marty Hurney, could have predicted this record. This is about the proper time to take stock of where Carolina stands since the season ended. The Panthers are about to enter the offseason with a completely new coaching staff and roster, and it's an offseason during which they must raise expectations in order to remain competitive in this league. The biggest question mark on Carolina's roster is at inside linebacker. James Anderson and Bruce Irvin both played very well, but the Panthers have some concerns at the position, and they would love to add at least one more player. Adding a starter at either spot would be ideal for Carolina, who went without starters at
