Mybook Rescue Tool V 1 0 2010

Save hard disk images onto USB flash drives, external hard drives, or other storage media for a few easy ways to get your data back in case of a sudden hard drive failure. The latest versions of all major operating systems are compatible with third-party hard drive data recovery software. If you need to recover data from a faulty, failing, or gone or removed hard disk drive, you can recover the data. You can try using these steps as described below to get some of your data back or you can use any of the tools. The method described here is more effective and uses less money than a data recovery service. The recovery process takes hours compared to days with a data recovery service. You can use my information to recover your data, but if you have a question or issue, let me know and I'll try to help you out the best I can.

Solution 3: Recovering Data from a Hard Drive Using Windows

The steps below show you how to remove a hard disk from your system, then use Windows Disk Management to salvage the data. It may be possible to retrieve some of the data (see steps 16 and 17) and your computer may be operating for a short time afterward. Using a USB Hard Drive

Before removing the hard drive from your system, you can try using a USB hard drive to store the data you can recover. While a USB hard drive is a temporary solution, it may be enough to save your data. System requirements

Before following this process, you will need a computer with an available USB port or other method of connecting a USB hard drive. You will also need an external hard drive to store the data that can be recovered from the failed hard disk drive.

Steps

Step 1 Insert a USB hard drive and attempt to read the data on the hard drive. If you are able to read the data, there is a chance you can recover some or all of the data.

Step 2 Click Start and type regedit in the Search box. (Don't worry, you'll see where this is going.)

Step 3 Click Start, type regedit in the Search box again, and then press ENTER.

Step 4 In the Registry Editor, locate and then delete the following keys: HKEY_LOCAL_0cc13bf012

These products (Cheap Digital Cameras, Digital Photo Frames &) are offered by the company for sale, and discount is provided by us..
