Portable RapidTyping Crack+ Free

RapidTyping can be used by anyone to learn how to type fast and accurate. For many of us, computer typing is as easy as striking the keys of a standard keyboard. For a few of us, it's not so simple... RapidTyping offers a different and easier way of learning how to type, based on a proven method for melding life and learning. According to RapidTyping's method, we should use a combination of automated left-brain activity (ie. activity based on repeating patterns, memorization and linkages) and the right-brain activity that we prefer (ie. activity based on creating, inventing and discovery). By using an innovative and easy-to-use interface, RapidTyping makes us learn at the highest level of activity, where learning is fun and easy! RapidTyping helps you: FOCUS: Your computer screen is a rich information source with lots of clues and clues that it's up to you to spot and respond to. Can you distinguish the information you're looking for? Are you noticing the connections between the things you're looking at? Do you find yourself getting distracted by the peripheral information you're looking at? LEARN: Do you see patterns in writing? Can you remember the basic shapes? How about the numerical value of the letters? While you practice RapidTyping, you will be presented with a new challenge and you will have to figure it out without the use of a keyboard! CATCH: With RapidTyping's visual clues, you'll get hints about the correct answer before you've even touched the keyboard. ACTIVITY/LEARNING: Because RapidTyping's challenge is visual and most people associate the left-brain with rational activity, you will naturally start thinking this way. You'll notice that most text on the screen is presented by word. With RapidTyping, you are presented with the correct answer before you type the letter it should have been. Therefore, the left-brain is not being used. A "learning by doing" approach is used instead. Do you have to memorize a lot of text? How many words do you know in the English language? PORTED VERSION: It is extremely common to need to be able to access your programs at a moment's notice. With the Portable versions of your favorite programs, you can view them anywhere and at any time. But when you run programs from a thumb drive, you can be sure that you will not loose those files

Portable RapidTyping Crack + With License Key

This is the portable version of RapidTyping, a handy program which you can use to learn how to type fast and accurate. Can function even from a thumb drive Since installation is not necessary, Cracked Portable RapidTyping With Keygen can be stored on a USB flash drive, plugged into any computer and you can directly run its executable file. But the most important part is the fact that your Windows registry entries will remain intact. Once you initialize the software with the user-friendly interface, you can select the language that you will work with, as well as your keyboard layout. So, all you have to do is put your fingers in the base position and carefully type the words seen on the screen while using the correspondent fingers. Select your difficulty level and view results In addition, you can choose between three levels of difficulty (beginner, intermediate and expert), select the lesson type (basics, shift keys, numeric pad, digits and symbols) and the lesson itself. Plus, you can restart the lesson, view course statistics on the lesson and day group, edit lessons and create new courses. Once you complete a lesson, you can check out results which revolve around the rating (e.g. words per minutes, characters per minute, accuracy) and errors. Also, you can check out an up-to-date webpage with the current champions. To end with RapidTyping doesn't put too much strain on the computer, since it uses a low-to-moderate amount of system resources. There's also a well-drawn help file that you can check out. We highly recommend Portable RapidTyping to all users, especially novices. Description RapidTyping is a very useful and handy program which you can use to learn how to type fast and accurate. It is a completely free portable version of RapidTyping, a versatile program which you can use to learn how to type fast and accurate. After initialization and installation, you can select the language that you will work with, as well as your keyboard layout. So, all you have to do is put your fingers in the base position and carefully type the words seen on the screen while using the correspondent fingers. Plus, you can view statistics on the lesson and day group, edit lessons and create new courses. Once you complete a lesson, you can check out results which revolve around the rating (e.g. words per minutes, characters per minute, accuracy

System Requirements For Portable RapidTyping:

Please note: The application is in beta at this time, and all your comments and suggestions are greatly appreciated. At the moment we are testing the application on various devices, and you will notice that it is not performing exactly the same way on every device. If you come across a device that is not behaving properly, please report it in the comments section. Note that if you switch your display settings to anything other than your "native" display resolution (e.g. 1280x1024), you will not be able to perform these tests accurately. Also, you should check your screen resolution before
