it's important to know that the windows mobile 7 sdk and ctp are not available for download yet, and don't seem likely to be for some time. the windows mobile 7 sdk was a free download before the smartphone hardware even existed, so why is there still no sdk for the omnia m? i'm not going to pretend to know the answer to that, but i can tell you that this site is one of the few that does have windows mobile 7 sdk news (and a lot of other windows mobile news too). i personally would be worried about buying a phone that was not going to be available when the os is released, so i wouldn't rely on a site for nokia news for a samsung device, which is what i would do if i wanted to keep up to date with the status of the sdk. the developer community has been quite busy producing lots of applications and games for windows mobile and there are many of them to be found through sites such as wmfreeware, which i link to above. as well as these sites, there's a ton of information about the windows mobile platform on the internet, and a lot of it is around the free apps, such as the one listed above. the omnia m comes with an upgraded version of windows mobile 6.5. however, microsoft still hasn't fixed the issues of the os getting bogged down and requiring a system reboot to even turn it off (the longest this has ever taken me is about 15 seconds). though, to be fair, i only ever used the omnia m for a couple of days, so i'm not saying it was the manufacturer's fault that i was unable to actually use the os more than once, and i've always got the sense that the device is trying to be perfect. the omnia m has a very long battery life, and it's about as powerful as a first generation iphone.

the htc z610 is an odd device. in some ways it's a windows phone 7.5 smartphone, offering a full keyboard and many of the same features. but it's a windows mobile 6.1 handset at heart, and it's lack of a rear camera and microsd slot, the presence of which is what tipped the scale for me. the z610 will be available in three colours: black, silver, and red. it'll be available with 3g and 4g (lte) options, as well as an optional windows phone 7.5 kit. the omnia neo 7 is the updated version of the samsung omnia neo, with a new processor and a revamped ui. it's an excellent handset with a good camera, and best of all, it runs windows phone 7.8! if you're looking for the latest windows phone, the neo 7 is your phone. the nokia windows phone handsets have been the focus of most of the windows mobile criticism over the past couple of years, so it's a bit odd that samsung is the first manufacturer to unveil its own windows phone 7.5 handset. the samsung omnia m is a quality smartphone that uses a lot of nokia and windows phone design dna, but the interface, which is based on windows phone 7.5, is decidedly samsung-ish. the omnia m will be available in two colours: silver and red. it'll be available with 3g and 4g (lte) options, as well as an optional windows phone 7.5 kit. the samsung omnia m isn't coming to the uk just yet, but it'll be available in the us with a 3g and a 4g (lte) sim. the 16gb model will cost you \$450, the 32gb version is \$550, and the model with a 4g (lte) sim is \$600. you'll be able to pick up the omnia m in either a silver or red colour, and you can pre-order it today. 5ec8ef588b
